Professional Summary

Software and AI engineer, BS Computer Engineering from UP Diliman (University Scholar, DOST-SEI Merit Scholar), building **production AI agent systems** for the Philippine government. Built and operated a **tool-calling AI agent** a Cabinet-level office has used **daily since Feb 2026**, and a **multi-agent system** running **14 scheduled jobs** with **human-in-the-loop confirmation before writes**. Hands-on with LLM APIs (Anthropic, OpenAI, Gemini), **MCP** integrations, and **Python and Node.js / TypeScript** pipelines on **GCP**.

Core Competencies

Production LLM Agents & Tool Calling • Multi-Agent Orchestration • Model Context Protocol (MCP) Integrations • Human-in-the-Loop Guardrails • Python & Node.js / TypeScript • Data Pipelines & ETL on GCP • Document-Generation Pipelines • API Integration (REST, OAuth 2.0)

Work Experience

DICT — OFFICE OF THE ASSISTANT SECRETARY FOR INTERNAL SYSTEMS (OASIS) Quezon City, PH
AI Engineer & Executive Assistant II Aug 2025 – May 2026

- **Kuya A — AI Executive Assistant:** Built and operated a **tool-calling AI agent** on Node.js / OpenClaw serving the Office of the Secretary (Cabinet-level), **in daily use since Feb 2026** across multiple Telegram session contexts.
- Cut the Secretary's query turnaround from staff inbox-trawling (minutes to hours) to **seconds**: schedule lookups, free-window finding, and on-demand email and letter retrieval requested directly in chat.
- Engineered the **document-generation pipeline** (Open XML to LibreOffice to PDF) producing the Secretary's daily schedule, briefers, and meeting minutes from Google Calendar and Sheets; runs **10+ cron workflows** with **multi-account OAuth 2.0 across 3 Workspace identities** and pre-send guardrails.
- **Aya — Multi-Agent AI Assistant:** Designed and ran a **multi-agent system** on OpenClaw (Claude Sonnet 4.6, Discord-native) orchestrating end-of-day reporting, document generation, and compliance reminders across **14 scheduled jobs** in isolated agent sessions.
- Built an accomplishment-reporting pipeline connecting the agents to existing **Discord, Google Sheets, and Jira MCP servers**, with LLM text formalization, fuzzy task matching, and **human-in-the-loop confirmation before writes**; agent behavior encoded as version-controlled Markdown.
- **Social Media Sentiment Analytics Platform:** Built and owned a platform delivering **dashboards to DICT leadership** and the comms team; implemented LLM sentiment classification (Anthropic and OpenAI APIs) over **Python pipelines on GCP**, turning raw social data into dashboard-ready summaries.
- **Oplan Bantay Signal:** Designed the Six Pillars Grading Methodology on Ookla Speedtest Intelligence data and built **Pandas automation pipelines**; led monthly analyses and Quarterly Business Review decks for PLDT and Smart for DICT's **nationwide telco service-quality program**.

AURORA PACIFIC ECONOMIC ZONE AND FREEPORT AUTHORITY (APECO) Parañaque City, PH
Acting Chief of Staff – Technical Staff Sep 2024 – Aug 2025

- Supervised technical staff and ran quality control on official documents; drafted policy memoranda and high-level correspondence for inter-agency and investment-promotion engagements.

Education

UNIVERSITY OF THE PHILIPPINES DILIMAN Quezon City, PH
BS Computer Engineering Jul 2025
University Scholar; DOST-SEI Merit Scholar

Certifications

Agent Development Kit (ADK) Google Cloud
Agent Fundamentals Google Cloud
Enterprise Agents & Use Cases Google Cloud
Gemini Enterprise Application Google Cloud

Skills

Languages: Python, Node.js / TypeScript, SQL, C, Bash
AI / LLM: Anthropic Claude API, OpenAI API, Google Gemini API, Multi-Agent Systems, Agent Development Kit (ADK), OpenClaw, Model Context Protocol (MCP), Prompt Engineering
Web & APIs: React, Next.js, Express, REST APIs, OAuth 2.0, Telegram / Discord Bot APIs, Google Workspace APIs, Jira / Atlassian Cloud
Data & Infra: Pandas, PostgreSQL, SQLite (FTS5), GCP, ETL Pipelines, LibreOffice headless, Open XML, Debian / WSL2, systemd, cron, Git
